TUNZE®

High Tech Aquarium Ecology

As a leading company in aquaristics since 1960, TUNZE® Aquarientechnik is delighted about the cooperation with the pioneering market leader in aquarium illumination DiCon - Kessil®.

For more than a quarter of a century, DiCon has specialized in making products that direct high-speed laser beams into miniscule, hair size fiber optic cables for the telecom, defense / military, and biomedical sectors. In the early 2000's, DiCon realized the transition to LEDs was imminent and invested heavily in the technology. As a result, three new business units were created. DiCon LED pushes the forefront of this movement with its proprietary high density LED array, and DiCon Lighting applies the platform in lighting fixtures for the architectural and entertainment industries. Specializing in the field of aquarium illumination, Kessil®'s story begins in the San Francisco Bay Area, the epicenter of the indoor growing industry. The innovative ideas and specific experiences of three UC Berkeley graduates and their cooperation with DiCon in various projects were the basis for the foundation of Kessil®. In early 2009, the graduates presented their business proposal to DiCon's management team who accepted the plan right away. The three founders put things into action and defined the initial business direction, designed the first generation prototypes, and performed a few basic experiments. DiCon also invested heavily and provided resources such as a large space for Kessil®'s plant research lab and creating Dense Matrix LEDs with a variety of spectrums. Kessil®'s staff includes DiCon's top optics experts and senior product designers. Today, each of DiCon's business divisions are recognized leaders in their respective fields, designing and manufacturing quality products with differentiating technology, advancing photonics knowledge through continuous research, and building customer relations with consistently first-rate service. We are delighted to now supplement our own range of high-quality LED lights for aquariums with Kessil® LEDs. TUNZE® Aquarientechnik develops and produces highly specialized LED luminaires in PU resin for IP 68 security, that can be used both above and as the only supplier on the market under the water surface in the aquarium. Underwater use results in a significant increase in performance and minimization of electrical losses. Like the TUNZE® pump technology, TUNZE® LEDs are an impressive example of how modern technology and contemporary design in the aquarium can be turned into art. The symbiosis between the two strong companies Kessil® and TUNZE® offers you the best selection of innovative lighting technology for aquariums and natural biotopes.

What does "Kessil®" mean?

K is for Kelvin, the unit for color temperature.
E is for emission of light from an LED.
S figuratively derives from carbon capture and stands for energy efficiency and environmental friendliness. With a little trick, double s was made out of it.
L is for intensity from the Dense Matrix LED
I stands for Lambda, the unit for wavelength / spectrum. Kessil® creates very efficient and unique spectrums.

Tuna Blue For saltwater aquariums Tuna Sun For freshwater aquariums

Kessil® Logic™

Spectral Controller Spectral Controller X

- Kessil®'s patented Dense Matrix LED technology concentrates multiple LED chips into a single array, creating a powerful and penetrating light source with wide coverage. Penetration can be further enhanced by positioning multiple units in close proximity to each other.
- Kessil® Logic™ maintains persistent output across the entire adjustable spectrum (10,000 K to Actinic for Tuna Blue, 6,000 to 9,000 K for Tuna Sun) and thereby also consistent coral and plant growth.
- Beautiful, unrivaled shimmer replicates the look of natural sunlight reflecting from the water.
- The innovative heat management system enhances efficiency and longevity.
- Different wavelengths are seamlessly blended within a single LED array, emitting uniform color across the coverage range.
- A proprietary blend of UV light enhances coral growth and color.

Both intuitive Kessil® control units are equipped with flawless touch control and a vivid color display. The spectral controllers offer effortless light control at the touch of your fingertips. Their straightforward approach to light control programming allows for endless customization options without the confusion.

- Spectral Controller (for all Kessil® A360, A160, A80, H80, H160) is equipped with two separate 0-10V-output ports. Each port can control its own independent set of lights; whether it's two groups of lights on one aquarium, a display and refugium, or multiple tanks, a single controller links it all together.
- Spectral Controller X (for A360X and Kessil® 0-10V LED fixtures) is equipped with one K-Link port and one 0-10V output port. The K-Link port allows users to connect to the A360X, while the 0-10V port is for Kessil®'s 0-10V light fixtures. A USB power adapter (not included) is needed when using the Spectral Controller X for 0-10V lights only.
- Both controllers feature two ways of setting a customized light schedule to match individual tank or refuge needs.
- Using the Quick Set Mode, it is possible to create unique dawn and dusk effects by altering light intensity and color throughout six to eight different time points.
- The Acclimation Mode simplifies the introduction of new lights to a tank or new corals or plants to an existing setup. The acclimation timeline can be customized to suit specific needs.
- In the Manual Mode, spectrum and intensity can instantly be tuned for on demand light customization.

Kessil® 0-10V LED fixtures are also compatible with other 0-10V external controllers. Daisy-chain multiple lights for seamless control from a single source.

A360

The successor of the Kessil® A360 LED has a low profile design with higher light output (Higher Photon Volume Density), thanks to the redesigned, first-class sunflower heat sink with extended color control options, opening unlimited color combinations for aesthetics while maintaining the performance of the core spectrum. A360X features smoother color transitioning and dimming, including moonlight effects.

→ The smart K-Link communication method is an upgrade of the previous plug & play 0-10 V, allowing users to network multiple A360X together and set individual groups to run their own programs. A360X can be used with optical accessories to shape light, allowing users to modify the look of the aquarium to their liking.

→ The newly designed optics along with the latest generation Dense Matrix LED array provide a broader delivery of light and eliminate shading. Patented Dense Matrix LED technology concentrates multiple LED chips into a single array, creating a powerful and penetrating light source with wide coverage. The maximum penetration can reach 30" (75 cm) beyond the water's surface for most reefs.

→ Using the Kessil® A360X Narrow Reflector (optional accessory), center light intensity can be further enhanced by up to three times for further penetration – perfect for deep aquariums. Contrast, depth and dynamics of an aquarium get more impressive.

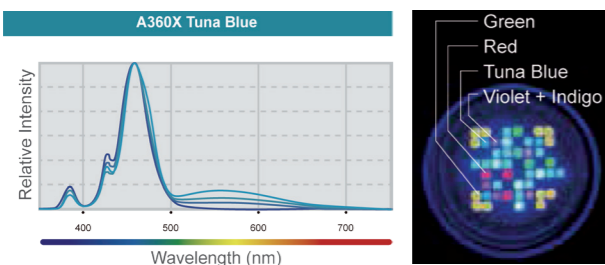

→ The well-known Tuna Blue / Sun spectrum has been proven by its users to promote coral or plant growth and enhance coloration.

→ Different wavelengths are seamlessly blended within a single LED array, emitting uniform color across the coverage range.

→ In addition to the popular Tuna Blue / Sun spectrum, users can add in Red, Green, and Violet+Indigo (Purple) by using the Spectral Controller X or the Kessil® WiFi Dongle.

Tuna Blue

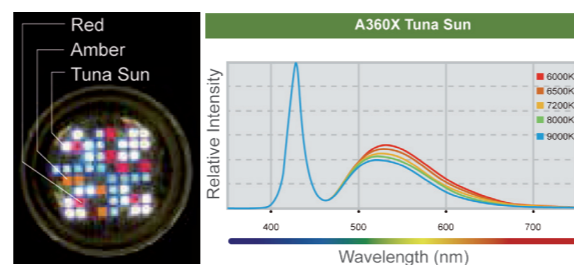

For saltwater aquariums

LED A360X Tuna Blue
 Dimensions (D x H): 4.3" x 2.1" (110 x 53 mm)
 Unit Weight: 0.8 lb (370 g)
 Spectrum: Deep Ocean Blue to Sky Blue + RGB
 Power Supply: 100-240V AC (input), 19V DC (output)
 Power Consumption: 90 W max
 KSA360XTB

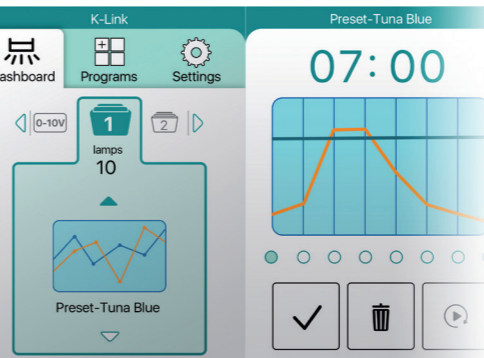

Tuna Sun

For freshwater aquariums

LED A360X Tuna Sun
 Dimensions (D x H): 4.3" x 2.1" (110 x 53 mm)
 Unit Weight: 0.8 lb (370 g)
 Spectrum: 6,000 to 9,000 K + RY
 Power Supply: 100-240V AC (input), 19V DC (output)
 Power Consumption: 90 W max
 KSA360XTS

Spectral Controller

Spectral Controller X
 Weight: 0.26 lb (120 g)
 Dimensions (L x W x H):
 5.6" x 2.5" x 0.56" (142 x 63 x 14 mm)
 Includes a 118" (3 m) K-Link cable.
 KSASC02

Premium Type-C connectors

The intuitive Kessil® Spectral Controller X for Kessil A360X LEDs and all the 0-10 V Kessil® lights is equipped with flawless touch control and a vivid color display. The Spectral Controller X offers effortless light control at the touch of your fingertips. Its straightforward approach to light control programming allows for endless customization options without the confusion.

→ The K-Link communication method is an upgrade of the easily plug & play 0-10 V, allowing users to network multiple A360X together (up to 32 X-luminaires per chain) and set individual groups to run their own programs. K-Link is also a two-way communication, meaning the Spectral Controller X can detect the number of lights in the network, the status of the lights, etc.

→ The controller is equipped with one K-Link port and one 0-10 V output port. The K-Link port allows users to connect to the A360X, while the 0-10 V port is for Kessil's 0-10 V light fixture. A USB power adapter (not included) is needed when using the Spectral Controller X for 0-10 V lights only.

→ The Program Mode features three ways of setting a customized light schedule to match individual tank or refuge needs. A maximum of 12 programs can be created.

→ Using the Quick Set Mode, it is possible to create unique dawn and dusk effects by altering light intensity and color throughout eight different time points.

→ The Acclimation Mode simplifies the introduction of new lights to a tank or new corals or plants to an existing setup. The acclimation timeline can be customized to suit specific needs.

→ In the Manual Mode, spectrum and intensity can instantly be tuned for on demand light customization.

WiFi Dongle

WiFi Dongle
 Dimensions (L x W x H): 2.08" x 1.26" x 0.67" (53 x 32 x 17 mm)
 Weight: 0.41lb (20 g)
 Operating frequency: IEEE 802.11 b/g/n (2.4GHz)
 KSAWD01

The WiFi dongle efficiently controls a Kessil® A360X with Android / iOS smartphone or up to 32 X-luminaires with the K-Link connection cable, minimizing wireless interference and ensuring a faster and more reliable connection. Features include full color control, acclimation, lunar cycle, weather effects and more!

A160 A360

Straightforward control and programming by Spectral Controller or Spectral Controller X.

Tuna Blue For saltwater aquariums

Tuna Sun For freshwater aquariums

Kessil® Logic™

LED A160WE Tuna Blue
Dimensions (H x D):
4" x 2.48" (102 x 63 mm)
Weight: 0.69 lb (320 g)
Spectrum: Deep Ocean Blue to Sky Blue
Coverage: Up to 24" (60 cm) surface diameter
Average penetration for most reefs:
24" to 30" (60-76 cm)
Power Supply: 100-240V AC (input), 19-24V DC (output)
Power Consumption: 40 W
KSA160WETB

A160WE Tuna Sun

LED A160WE Tuna Sun
Dimensions (H x D):
4" x 2.48" (102 x 63 mm)
Weight: 0.69 lb (320 g)
Spectrum: 6,000 to 9,000 K
Coverage:
Up to 24" (60 cm) surface diameter
Average penetration for most plants:
24" to 30" (60-76 cm)
Power Supply: 100-240V AC (input),
19-24V DC (output)
Power Consumption: 40 W
KSA160WETS

LED A360NE Tuna Blue
Dimensions (H x D):
4.5" x 4" (114 x 101 mm)
Weight: 1.15 lb (520 g)
Spectrum: Deep Ocean Blue to Sky Blue
Coverage: Up to 18" (45 cm) surface diameter
Average penetration for most reefs: 30" to 36" (76-91 cm)
Power Supply: 100-240V AC (input), 19V DC (output)
Power Consumption: 90 W
KSA360NETB

A360WE Tuna Sun

LED A360WE Tuna Sun
Dimensions (H x D):
3.6" x 4" (91 x 101 mm)
Weight: 0.95 lb (430 g)
Spectrum: 6,000 to 9,000 K
Coverage: Up to 24" (60 cm) surface diameter
Average penetration for most plants: 24" to 30" (60-76 cm)
Power Supply: 100-240V AC (input), 19V DC (output)
Power Consumption: 90 W
KSA360WETS

LED A360WE Tuna Blue
Dimensions (H x D):
3.6" x 4" (91 x 101 mm)
Weight: 0.95 lb (430 g)
Spectrum: Deep Ocean Blue to Sky Blue
Coverage: Up to 24" (60 cm) surface diameter
Average penetration for most reefs: 24" to 30" (60-76 cm)
Power Supply: 100-240V AC (input), 19V DC (output)
Power Consumption: 90 W
KSA360WE

A80

Kessil® Logic™

The elegant fanless design of the A80 LEDs is combined with a unique and compact Dense Matrix array and optics design which ensures efficient coverage and penetration as well as outputting the most photon energy per watt of any Kessil® fixture.

- Different wavelengths are seamlessly blended within a single LED array, emitting uniform color across the coverage range.
- A proprietary blend of UV light enhances growth and color of corals or plants.
- Dense Matrix LED technology produces a concentrated single point source with enough power to deliver light to the entire unit. By combining a unique fanless design and the compact Dense Matrix array, the H80 outputs the most photon energy per watt of any Kessil® fixture.
- Easy-to-use color dials allow the user to switch between the spectrums and intensity for a personalized look.
- An innovative heat dissipation allows for fanless, low maintenance, elegant design.
- Controlled by Spectral Controller or Spectral Controller X.

Tuna Blue For saltwater aquariums

Tuna Sun For freshwater aquariums

A80 Tuna Blue

LED A80 Tuna Blue
Dimensions (D x H): 4.88" x 0.98" (124 x 25 mm)
Weight: 0.88 lb (400 g)
Spectrum: 10,000 K to Actinic
Coverage: Up to 24" (60 cm) surface diameter
Power Supply: 100-240V AC (input), 24V DC (output)
Power Consumption: 15 W
KSA80TB

A80 Tuna Sun

LED A80 Tuna Sun
Dimensions (D x H): 4.88" x 0.98" (124 x 25 mm)
Weight: 0.88 lb (400 g)
Spectrum: 6,000 to 9,000 K
Coverage: Up to 24" (60 cm) surface diameter
Power Supply: 100-240V AC (input), 24V DC (output)
Power Consumption: 15 W
KSA80TS

Tuna Flora

Kessil® H80 and H160 Tuna Flora are groundbreaking full spectrum LED refugium lights which are intensity and spectrum controllable, perfect for most refugium algae such as chaetomorpha and caulerpa and most plants. The light is perfectly blended, with wavelengths including near UVA and Infrared (ranging from 380-780 nm), enhancing photosynthetic efficiency.

- The BLUE spectrum (420 – 490 nm) quickly develops the frame of a plant during every stage by promoting prolific stem extension.
- The GROW spectrum is designed to produce all-around vegetative growth throughout the life cycles of many different plants.
- The BLOOM spectrum boosts yield by encouraging plentiful flowering during the plants' crucial reproductive stage.
- The RED spectrum (650 – 750 nm) is designed for tissue culture and cloning by producing maximum root growth during the plant's whole life. During the finishing stage, the RED spectrum also increases the plants' productivity and the quality of the harvest.
- Dense Matrix LED technology produces a concentrated single point source in the H160 LED fixture with enough power to penetrate past the canopy and deliver light to the entire plant.
- By combining a unique fanless design and the compact Dense Matrix array, the H80 outputs the most photon energy per watt of any Kessil® fixture.
- Controlled by Spectral Controller or Spectral Controller X.

H80 Tuna Flora

LED H80 Tuna Flora
 Dimensions (D x H): 4.88" x 0.98" (124 x 25 mm)
 Weight: 0.88 lb (400 g)
 Spectrum: Blue, Grow (Purple), Bloom (Magenta), Red
 Coverage: Up to 24" (60 cm) surface diameter
 Power Supply: 100-240V AC (input), 24V DC (output)
 Power Consumption: 15 W
 KSH80TF

H160 Tuna Flora

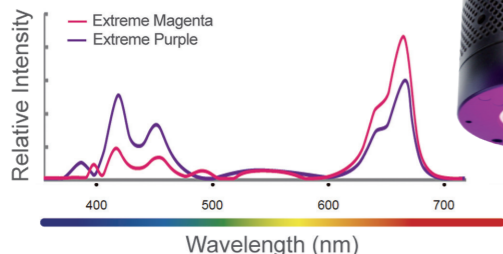

LED H160 Tuna Flora
 Dimensions (H x D): 4" x 2.48" (102 x 63 mm)
 Weight: 0.88 lb (400 g)
 Spectrum: Blue, Grow (Purple), Bloom (Magenta), Red
 Coverage: Up to 24" (60 cm) surface diameter
 Power Supply: 100-240V AC (input), 19V DC (output)
 Power Consumption: 40 W
 KSH160TF

Grow Light

Just as plants and algae have different nutrient requirements at different stages, they also develop unique light requirements throughout their growth. The Kessil® H380 Grow Light can toggle between two full-spectrum UV blends to maximize its effectiveness through both the grow and bloom phases of plant cultivation. It is specifically designed to cultivate macroalgae in a refugium tank. Patented Dense Matrix LED technology creates a powerful and penetrating light source that delivers light to the entire plant / algae. H380 Grow Light cannot be controlled by the Spectral Controller / Spectral Controller X.

H380 Grow Light

LED H380 Grow Light
 Dimensions (H x D): 4.5" x 4" (114 x 101 mm)
 Weight: 1.15 lb (520 g)
 Spectrum: Extreme Purple for thick and lush growth, extreme Magenta to increase the quality and quantity of the plants' yields, UV
 Coverage: 24" surface diameter by 3" penetration (on average)
 Power Supply: 100-240V AC (input), 19V DC (output)
 Power Consumption: 90 W max.
 KSH380N

A360

Refugium

The low profile Kessil® A360X Refugium LED enables the spectrum to be adjusted depending on the development phase of the algae, soft corals or plants in a refugium. The extensive possibilities of color control are just as convincing as their high light output. With the included Kessil® A360X Narrow Reflector, the light intensity of the central light beam of the A360XRF LED can be increased threefold and thus more penetration can be generated, unwanted light scattering is prevented. Compatible with the Kessil® WiFi Dongle.

- The BLUE spectrum accelerates the growth of algae / soft corals / plants at any stage by encouraging prolific stem extension.
- The GROW spectrum improves vegetative growth of many different macroalgae.
- The BLOOM spectrum increases yield.
- The RED spectrum promotes root growth and productivity.
- The green light can be used to monitor the plants without disturbing the plant's growth cycle. (only available with WiFi-Dongle).
- The daylight mode can be used to clean the tank or to take photos.

LED A360X Refugium
 Dimensions: 4.3" x 2.67" / 110 x 68 mm
 Weight: 0.86 lb / 390 g
 Spectrum: red, green, blue (RGB), Bloom, Grow, daylight
 Light spread: up to 24" (60 cm) surface diameter
 Penetration: 24" - 30" (60 - 75 cm)
 Power Consumption: 90 W max
 Power Supply: 100-240V AC (input) 19V DC (output)
 KSA360XRF

AP700

LED AP700
 Dimensions (L x W x H): 20" x 6.4" x 1.5" (51 x 16 x 4 cm)
 Unit Weight: 4.81 lb (2.18 kg)
 Spectrum: Full Color
 Coverage: Up to 48" x 24" (122 x 61 cm)
 Average penetration for most reefs: 24" to 30" (60-76 cm)
 Power Supply: 100-240V AC (input), 48V DC (output)
 Power Consumption: 185 W
 KSAP700

Kessil® Logic™

The Kessil® AP700 panel-design saltwater aquarium light, features quiet operation, innovative heat management and efficient, long-lasting LED construction. Its high efficiency Hybrid Optics and Dense Matrix arrays deliver more power and greater coverage while increasing penetration through the water column and mimicking the effect of a Metal Halide T5 combo. This 185 Watt panel platform features flawless touch control to easily adjust intensity and color and to select the moonlight mode. Built-in WiFi provides even greater control and ease of customization.

- Dense Matrix LEDs deliver a full color spectrum. Independently adjustable LED channels allow users to set a preferred color. With iOS / Android apps, users can choose a range of blue from Deep Ocean Blue to Sky Blue, and can even select other colors such as green, yellow, red and purple for a different aesthetic.
- Different wavelengths within a single LED array are seamlessly blended, emitting a uniform color with widespread coverage.
- For excellent coral growth and coloration, the specially designed lens and reflector combination provides a broader delivery of light and superior penetration (up to 48" of coverage) and virtually eliminates shading while minimizing hot spots.
- Together with a proprietary blend of precision UV light, independently adjustable color channels enable users to tune a preferred color within the spectral range while maintaining the best usable spectrum for coral growth and coloration.
- WiFi Controllability: The iOS / Android tablet apps give users access to advanced manual control and program customization, as well as offering the ability to sync groups of lights. The app features include full color wheel control, acclimation, lunar cycle, weather effects, and more.

Accessories

Spectral Controller

The intuitive Kessil® Spectral Controller for all Kessil® LED fixtures A360, A160, A80, H160, H80 with 0-10 V is equipped with flawless touch control and a vivid color display. The Spectral Controller offers effortless light control at the touch of your fingertips. Its straightforward approach to light control programming allows for endless customization options. Weight: 0.24 lb (110 g)
Dimensions (L x W x H): 5.6" x 2.5" x 0.6" (142 x 63 x 14 mm)
KSASC01

A360X Narrow Reflector

The A360X Narrow Reflector strengthens the center light intensity of the A360X by up to three times – perfect for deep tanks. The Narrow Reflector features an easy to attach magnetic design. Beam Angle: 55°
Mounting Height: 8" - 12" (20-25 cm) above water surface
KSAOK03

Kessil® Gooseneck only for A80 LED

Kessil's Mini A Series Gooseneck is a versatile mounting option that allows you to customize the positioning of your light. The 10 inch arm attaches the Kessil® A80 aquarium light securely to the top of a tank without a canopy. Weight: 0.73 lb (330 g)
Dimensions: \varnothing 0.57" x H 10" (\varnothing 15 mm x H 254 mm)
KSAGN03

A-Series Gooseneck

Kessil's A Series Gooseneck is a versatile mounting option that allows you to customize the positioning of your A160, H160 or A360 LED. Designed to be used on most glass tanks, its 24 inch malleable but sturdy arm provides a strong, adaptable solution to install your Kessil® aquarium light. Weight: 1.92 lb (870 g)
Dimensions: \varnothing 0.6" x H 23.6" (\varnothing 15 mm x H 599 mm)
KSAGN01

90° Gooseneck Adapter

For A Series Gooseneck to gain additional reach for larger aquariums. Weight: 0.11 lb (50 g)
Dimensions: \varnothing 0.7" x H 1.97" (\varnothing 18 mm x H 50 mm)
KSAGA90

Full Angle Adapter

Compatible with Mounting Arm, 90° Gooseneck Adapter, DIY mounting solutions. It allows lights to be angled or tilted. Weight: 0.15 lb (70 g)
Dimensions: \varnothing 1.12" x H 2.09" (\varnothing 28.5 mm x H 53 mm)
KSAGA360

90° Gooseneck Bracket

For A Series Gooseneck to maintain a low profile look. The Bracket can be installed in less than 1 minute to the A360X or A360 and A Series Gooseneck. Weight: 0.13 lb (60 g)
Dimensions (L x W x H): 4.7" x 0.8" x 1.1" (119 x 20 x 28 mm)
KSAGB90

AP700 Canopy Kit

The Kessil® AP700 Canopy Kit allows the Kessil® AP700 LED aquarium light to be mounted to the inside of most aquarium covers. Each extension leg is 11.2" (284 mm) long and is designed to be inserted into the AP700. The two extension legs allow you to firmly suspend the AP700 to the top of your aquarium cover. Our recommendation is to hang the AP700 15" - 18" (38 - 46 cm) above water surface to obtain a 48" x 24" (120 x 60 cm) coverage for mixed reef tanks, and 5" - 7" (13 - 18 cm) above water surface for a 36" x 24" (90 x 60 cm) coverage for SPS dominant tanks. Weight: 0.42 lb (190 g)
Dimensions (L x W x H): 11.2" x 4.3" x 2" (284 x 109 x 51 mm) (Unit x2)
KSACM01

AP700 Hanging Kit

The AP700 Hanging Kit allows the Kessil® AP700 LED to be hung from your ceiling or even within your canopy. Our recommendation is to hang the AP700 15" - 18" (38 - 46 cm) above water surface to obtain a 48" x 24" (120 x 60 cm) coverage for mixed reef tanks, and 5" - 7" (13 - 18 cm) above water surface for a 36" x 24" (90 x 60 cm) coverage for SPS dominant tanks. Weight 0.37 lb (170 g)
Length: 118" (300 cm) (Unit x2)
KSAHM01

Mounting Arm

Kessil's Mounting Arm is a premium mounting option that allows you to install Kessil® aquarium lights directly to your tank. The Mounting Arm is adjustable in heights and from back to front (for 18" - 24" / 46 - 61 cm wide tank), together with advanced cable management to house the cable inside the arm, providing a perfect and sleek mounting option for rimmed and rimless tanks. It is compatible with A160, A360WE/NE, A360, A360X and AP700 (2 required for AP700). Weight: 1.76 lb (800 g)
Dimensions: \varnothing 1" x W 12.32" - 15.43" x H 20.78" (\varnothing 25 mm x W 313 - 392 mm x H 528 mm)
KSAGN02

Extended Slide Bar

The Kessil® Extended Slide Bar lengthens the reach of the Mounting Arms by up to 3.5" (89 mm). This accessory gives users with wider tanks (25"-32" / 64-80 cm) the ability to mount their Kessil® lights precisely where needed. Easy installation and sturdy construction make the Extended Slide Bar a great accessory for large tanks. Weight: 0.42 lb (190 g)
Dimensions: \varnothing 0.86" x L 12.4" (\varnothing 21.8 mm x L 31.5 cm)
KSASB02

Extension Mount

The Kessil® Extension Mount is designed to be used with the Mounting Arm and provides customers with additional mounting option. It is designed specifically for acrylic or euro-braced tanks, by affixing the mounting arms to the tank stand. The Extension Mount comes with two extension tubes, allowing a total length of 57.5" (1.46 m). It is compatible with A160, A360, and AP700. Weight: 1.32 lb (600 g)
Dimensions: \varnothing 1" x H 37.8" (\varnothing 25 mm x H 96 cm)
KSAEM01

Accessories

Type 1 Control Cable (for Neptune Controller)
Connection cable between external controller and Kessil® LED A80 / A160 / A360W / A360N.
Length: 6 feet (1.8 m) excluding connectors
Plug Types:
1/8" (3.5 mm) stereo male phono plug to RJ45 plug
Compatible with Neptune Apex Controller
KSACB01

Type 2 Control Cable (for Digital Aquatics Controller)
Connection cable between external controller and Kessil® LED A80 / A160 / A360W / A360N.
Length: 6 feet (1.8 m) excluding connectors
Plug Types: 1/8" (3.5 mm) stereo male phono plug to two 2POS 3 mm single row plugs
Compatible with Digital Aquatics Controller
KSACB02

Kessil 90° K-Link USB Cable - 10 feet
The Kessil® 90° K-Link Cable connects Kessil® A360X LEDs to each other or to the Spectral Controller X.
Length: 10" (3 m) excluding connectors
Plug Types: USB Type-C connector to USB Type-C connector
Compatible with Spectral Controller X, A360X
KSKLC90

Unit Extension Cable
6 feet Extension Cable for either between lights or between controller and light.
Length: 6 feet (1.8 m) excluding connectors
Plug Types: 1/8" (3.5 mm) stereo male phono plug to 1/8" (3.5 mm) stereo female phono jack
KSACB04

Kessil 90° Unit Link Cable - 10 feet
The Kessil® 90° Unit Link Cable connects any of 0-10V-controllable Kessil® lights to each other or to the Spectral Controller. Required to link canopy-mounted Kessil® A80 LEDs.
Length: 10" (3 m) excluding connectors
Plug Types: 1/8" (3.5 mm) stereo male phono plug to 1/8" (3.5 mm) stereo male phono plug
KSULC10

19V DC Power Extension Cable 6 feet, (1.8 m)
KSUCB19
