Product & Feeding Guide

Background to TMC

Tropical Marine Centre (TMC) has been Europe's leading supplier of quality marine fish and invertebrates to the ornamental trade since 1970, importing more than 1200 species of livestock from 26 countries around the world.

TMC supplies over 1500 retail stores in the UK and Europe with livestock and aquatic products and has a well established distribution network in mainland Europe with at least two distributors in each of the major European countries.

Tropical Marine Centre's objective has remained unchanged since the company was established in 1970 - to be the leading wholesaler of marine livestock to the trade with livestock ethically sourced, handled and imported and investment made in a sustainable trade.

Optimum Health

From the moment TMC livestock is collected, with all fish being individually net caught, everything possible is done to ensure the optimum health and welfare of the livestock and to minimise stress.

Whilst in TMC's fish holding facilities all livestock is fed only on Gamma Foods and every day we feed over 250,000 fish and inverts across our four fish houses!

TMC staff ensure feeding takes place as many times as possible during the day (up to 6 times), to try to replicate the constant grazing many marine fish are used to when on the reef, thereby minimising stress for the livestock. A variety of Gamma Foods are used - frozen, dry and liquid - and we regularly try different formulations to constantly improve feeding success. We understand different species' needs extremely well and also understand that variety, attractiveness and frequency is key to getting the best health and vibrancy out of our livestock. This strict feeding regime, using only the highest quality feeds, means fish will be eating well and will be in optimum health before reaching your aquarium.

Expertise

TMC's team of livestock experts and marine biologists have a huge wealth of knowledge in commercial aquaculture feed design. This led TMC, in the early 1990s, to develop its own formulations of nutritionally complete dry feeds for our hatchery, where we were rearing up to 150,000 clownfish of different varieties to a saleable size each year.

These specially formulated diets allowed us to achieve many breeding successes - at the end of 1997, the TMC hatchery became the first centre in the world to successfully breed significant numbers of Fire Shrimps (*Lysmata debelius*) and in 1999 we had the same success with Pipefishes (*Doryhamphus multiannulatus*), with a significant number of juveniles being raised to maturity.

Comprehensive Range of New Foods

This background in aquaculture and feed manufacture, together with our expertise in feeding the many fish, corals and other invertebrates we import each year, led us to develop our own range of foods, starting with Gamma Frozen Foods, then Gamma Dry Seaweed both of which are market leaders. We then launched our original Gamma Nutraplus Complete and Reef Feeds but unfortunately we had to cease production of this very popular range due to difficulties with raw materials supply.

Knowing that our livestock and fish houses, as well as home aquarists, could benefit from the convenience of a full range of frozen, liquid and dry feeds, we carried out a great deal of research and development to come up with a new, improved range of liquid feeds plus a whole new dry feeds concept, all set out in this brochure.

General Feeding Recommendations

- Always supply a varied diet of dry, frozen and liquid feeds for optimal health.
- Research your animals to find out which foods will work best for them - speak to your local fish shop if unsure.
- Always feed as much as your fish will consume in 10 mins and repeat throughout the day.
- Always remove uneaten food with a small net.

Explanation of Symbols

Complete

Nutritionally complete and suitable for every day feeding

Vitality Boost

With added vitality boosters. Suitable for feeding to new or stressed fish for up to 6 weeks

Algae & Colour Boost

With added colour enhancers. Suitable for every day feeding of herbivorous and other fish, corals and invertebrates

Enhancer

Supplementary food which can be added to other products in the Gamma range to enhance the nutritional profile

marine

tropical

coldwater

cichlid

discus

FROZEN

gamma blister

- Our **FROZEN food range** is a convenient and cost effective way of giving your fish a wide variety of 100% natural, easily digestible foods - great for finicky fish!

- Our **Gamma Blister** and **Gamma Slice** Frozen Foods are flash frozen at capture for freshness and are then gamma irradiated to guarantee that no pathogens are passed onto your livestock

- The original food in our Gamma range - first launched in 1976 - and the highest quality

- Gamma Blister is available in 100g packs (apart from Nano Marine Cuisine which is 50g)

- Gamma Slice is available in 250g packs

Feeding Gamma Frozen Foods

- Frozen food can be placed directly into the aquarium but we recommend defrosting as much as you need for each feed and straining off the water before putting in the aquarium. This aids nutrient control

- Frozen foods can also be enhanced with our Gamma NutraSpray products. Just defrost, strain off water, spray, mix and feed

gamma NutraPellets

- **Gamma NutraPellets** are soft, pre-mixed, sinking pellets
- Easy to feed - can be fed directly to aquarium inhabitants
- Manufactured in the UK, in small, highly controlled batches using TMC's own special formulation
- Used and tested by TMC to feed 100s of different species, with the highest rate of acceptability
- Nutritionally balanced, and made from 100% natural ingredients including Mussel, Krill, Prawn, Fish, Kelp, Spirulina Algae, Aloe Vera, Omega 3, Red and Green Nori, Pro-biotic yeasts, and Garlic
- Also includes aquaculture-based sensory attractants to encourage feeding
- The ingredients used have been pre-digested, so livestock can easily absorb and retain the nutritional content of the food, and then dried at low temperatures and cold extruded to retain essential amino acids and proteins. All these processes ensure high digestibility and encourage full consumption of the food, reducing waste and water pollution, and ensuring better water quality
- As the food is eaten by fish, fine particles will be released into the aquarium, providing food for small fish, corals and other filter feeders
- The pellets can easily be crumbled in your fingers for smaller fish. One size does all!
- Great for target feeding corals
- To avoid contamination, ensure hands are thoroughly dry before touching product and wash hands after use
- Ensure tub is re-sealed completely after every use

Gamma NutraPellets Complete

1.75mm Ø - 120g

(code 8343)

- Suitable for **every day feeding** of fish, corals and other invertebrates. Use as frequently as required, ensuring full consumption and no wastage
- Use in conjunction with Gamma Nutra Vitality Boost, Algae & Colour Boost and Liquid Feeds as well as Gamma Frozen and Dry Foods to provide a varied diet and maintain your fish in optimum condition

Ingredients: Fish and fish derivatives, crustacean powders and derivatives, aquatic appropriate yeasts, nutritional protein based binders, spirulina, natural stabiliser, acidity regulator, antioxidants. Vitamin A 22,500 IU/kg. Vitamin D3 2,000 IU/kg. Vitamin E 300mg/kg. Vitamin C (stable) 100 mg/kg

Gamma NutraPellets Vitality Boost

1.75mm Ø - 120g

(code 8344)

- With added vitality boosters, including probiotics, garlic, aloe vera and omega 3
- Suitable for feeding to new or stressed fish **for up to 6 weeks** to naturally maintain health
- Use in conjunction with Gamma Nutra Complete, Algae & Colour Boost and Liquid Feeds as well as Gamma Frozen and Gamma Dry Foods to provide a varied diet and maintain your fish in optimum condition

Ingredients: Cereal derivatives, seaweed derivatives, spirulina, crustacean powders and derivatives, aquatic appropriate yeasts, nutritional protein-based probiotics and binders, garlic, aloe vera, natural stabiliser, acidity regulator, antioxidants. Vitamin A 22,500 IU/kg. Vitamin D3 2,500 IU/kg. Vitamin E 400 mg/kg. Vitamin C (stable) 150 mg/kg

Gamma NutraPellets Algae & Colour Boost

1.75mm Ø - 120g

code 8345)

- With added colour enhancers and a specially formulated mix of green and red marine algae
- Suitable for **every day feeding of herbivorous** and other fish, corals and invertebrates. Use as frequently as required, ensuring full consumption and no wastage
- Use in conjunction with Gamma Nutra Complete, Vitality Boost and Liquid Feeds as well as Gamma Frozen and Gamma Dry Foods to provide a varied diet and maintain your fish in optimum condition

Ingredients: Red and green seaweed derivatives, root vegetable extracts, cereal derivatives, crustacean powders and derivatives, fish and fish derivatives, spirulina, aquatic appropriate yeasts, nutritional protein based binders, natural stabiliser, acidity regulator, antioxidants. Vitamin A 20,000 IU/kg. Vitamin D3 3,000 IU/kg. Vitamin E 350mg/kg. Vitamin C (stable) 175mg/kg

gamma NutraShots

DRY

Gamma NutraShots Complete

100g (code 8330)

- Suitable for **every day feeding** of fish, corals and other invertebrates. Use as frequently as required, ensuring full consumption and no wastage

Gamma NutraShots Vitality Boost

100g (code 8331)

- With added vitality boosters, including garlic, aloe vera and omega 3
- Suitable for feeding to new or stressed fish **for up to 6 weeks** to naturally maintain health
- Use in conjunction with Gamma Nutra Complete, Algae & Colour Boost and Liquid Feeds as well as Gamma Frozen and Gamma Dry Foods to provide a varied diet and maintain your fish in optimum condition

Ingredients: Cereal derivatives, seaweed derivatives, spirulina, crustacean powders and derivatives, aquatic appropriate yeasts, nutritional protein-based probiotics and binders, garlic, aloe vera, natural stabiliser, acidity regulator, antioxidants. Vitamin A 22,500 IU/kg. Vitamin D3 2,500 IU/kg. Vitamin E 400 mg/kg. Vitamin C (stable) 150 mg/kg

Gamma NutraShots Algae & Colour Boost

100g (code 8332)

- With added colour enhancers and a specially formulated mix of green and red marine algae
- Suitable for **every day feeding of herbivorous** and other fish, corals and invertebrates. Use as frequently as required, ensuring full consumption and no wastage
- Use in conjunction with Gamma Nutra Complete, Vitality Boost and Liquid Feeds as well as Gamma Frozen and Gamma Dry Foods to provide a varied diet and maintain your fish in optimum condition

Ingredients: Red and green seaweed derivatives, root vegetable extracts, cereal derivatives, crustacean powders and derivatives, fish and fish derivatives, spirulina, aquatic appropriate yeasts, nutritional protein based binders, natural stabiliser, acidity regulator, antioxidants. Vitamin A 20,000 IU/kg. Vitamin D3 3,000 IU/kg. Vitamin E 350mg/kg. Vitamin C (stable) 175mg/kg

• **Gamma NutraShots** are pre-mixed, ready to use food balls designed to enrich the animal's environment and stimulate natural grazing and feed responses

• Sticks easily to the side of the tank or rockwork allowing your fish to graze whilst giving you a close up view of your fish feeding!

• Nutritionally balanced, and made from 100% natural ingredients including Mussel, Krill, Prawn, Fish, Kelp, Spirulina Algae, Aloe Vera, Omega 3, Red and Green Nori, Pro-biotic yeasts, and Garlic

• Also includes aquaculture-based sensory attractants to encourage feeding

• The ingredients used have been pre-digested, so livestock can easily absorb and retain the nutritional content of the food, and then dried at low temperatures and cold extruded to retain essential amino acids and proteins. All these processes ensure high digestibility and encourage full consumption of the food, reducing waste and water pollution, and ensuring better water quality

• As the food is eaten by fish, fine particles will be released into the aquarium, providing food for small fish, corals and other filter feeders

• To avoid contamination, ensure hands are thoroughly dry before touching product and wash hands after use

• Ensure pouch is re-sealed completely after every use

• If necessary, moisten NutraShots with aquarium water or NutraPlus Liquid Feeds to rehydrate and improve adherence

LIQUID

gamma NutraPlus

• **Gamma NutraPlus Food Suspensions** are easily digestible liquid foods suitable for aquarium inhabitants

• They are an ultra convenient way of getting all the benefits of our Gamma Frozen Foods, but without the need for a freezer!

• The liquid the feed is preserved in contains crustacean derivatives which also act as a coral food and feed trigger

• Ready to use - can be added directly to the tank (no mixing or defrosting required)

Our Gamma NutraPlus Food Suspensions are available in three versions:-

Naturals: These use a single natural food source such as Mysis, which is suspended in water. Simple and natural for all aquarium inhabitants

Blends: These use a blend of natural foods and other high quality marine derivatives, making them a good option for species requiring particular diets. Perfect for small fish and filter feeders

Mixes: These combine high quality ingredients including crustacean, plankton and marine algae derivatives - perfect for corals and other inverts

Gamma NutraPlus Natural Brineshrimp Suspension

Available in 100ml - code 8350, 200ml - code 8360
500ml - code 8370

- Natural, liquid feed suspension using whole brineshrimp, suitable for all aquarium inhabitants
- For **every day feeding** of fish, corals and other invertebrates. Use as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, brineshrimp (*Artemia* sp.), salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Gamma NutraPlus Natural Mysis Suspension

Available in 100ml - code 8351, 200ml - code 8361
500ml - code 8371

- Natural, liquid feed suspension using whole mysis, suitable for all aquarium inhabitants
- For **every day feeding** of fish, corals and other invertebrates. Use as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, mysis (*Neomysis* sp.), salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Gamma NutraPlus Natural Krill Pacifica Suspension

Available in 100ml - code 8353, 200ml - code 8363
500ml - code 8373

- Natural, liquid feed suspension using whole krill pacifica, suitable for all aquarium inhabitants
- For **every day feeding** of fish, corals and other invertebrates. Use as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, krill pacifica (*Euphasia pacifica* sp.), salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Concentrated

Gamma NutraPlus Natural Mini Bloodworm Suspension

Available in 100ml - code 8352, 200ml - code 8362
500ml - code 8372

- Natural, **concentrated** liquid feed suspension using whole mini bloodworm, suitable for tropical and coldwater fish
- For **every day feeding**. Use as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, mini bloodworm (*Chironomus* sp.), salt, crustacean derivatives, EU permitted antioxidants and stabilisers

gamma NutraPlus

LIQUID

Gamma NutraPlus Blend Copepod Suspension

Available in 100ml - code 8354, 200ml - code 8364
500ml - code 8374

- Blended, **concentrated** liquid feed suspension that uses a blend of whole red plankton (*Calanus* sp.) and whole copepods
- Suitable for all aquarium inhabitants and ideal for dragonets, pipefish, seahorses and other small fish
- For **every day feeding** of fish, corals and other invertebrates. Use as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, red plankton (*Calanus* sp.), large and small copepods (0.5-1.8mm), salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Concentrated

Concentrated

Gamma NutraPlus Blend Reef Food Suspension

Available in 100ml - code 8355, 200ml - code 8365
500ml - code 8375

- Blended, **concentrated** liquid feed suspension, using a blend of marine fish eggs, whole red plankton (*Calanus* sp), krill pacifica and phytoplankton
- Specially formulated for **every day feeding** of marine inverts including all reef and mixed community filter feeders. Use as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, marine fish eggs (*Cypselurus* agoo sp.), red plankton (*Calanus* sp.), krill pacifica (*Euphasia pacifica* sp.), phytoplankton (*Nannochloropsis*, *Isochrysis*, *Tetraselmis*), salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Gamma NutraPlus Mix LPS Coral Suspension

Available in 100ml - code 8356, 200ml - code 8366
500ml - code 8376

- Mixed, **concentrated** liquid feed suspension, using a mix of crustaceans, plankton and marine algae
- Specially formulated for **frequent feeding of large polyped stony corals (LPS)** and other large marine invertebrates. Feed several times weekly or as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, crustacean derivatives, phytoplankton (*Tetraselmis*), salt, spirulina, aquatic appropriate yeasts, EU permitted antioxidants and stabilisers

Concentrated

Concentrated

Gamma NutraPlus Mix SPS Coral Suspension

Available in 100ml - code 8357, 200ml - code 8367
500ml - code 8377

- Mixed, **concentrated** liquid feed suspension, using a mix of crustacean, plankton and marine algae
- Specially formulated for **frequent feeding of small polyped stony corals (SPS)** and other small marine filter feeders. Feed several times weekly or as frequently as required, ensuring full consumption and no wastage

Ingredients: Water, crustacean derivatives, phytoplankton (*Nannochloropsis*, *Isochrysis*, *Tetraselmis*), salt, spirulina, aquatic appropriate yeasts, EU permitted antioxidants and stabilisers

Use in conjunction with other Gamma NutraPlus Food Suspensions, Gamma NutraShots and NutraPellets as well as Gamma Frozen and Dry Foods to provide a varied diet and maintain your fish in optimum condition

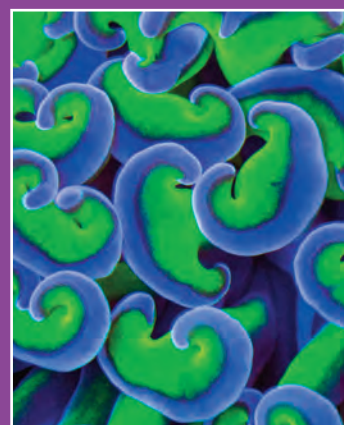

- Shake bottle well before use

- Can be added directly to the tank or for best results add the required amount to a small container of aquarium water before adding to tank as required

- Add to aquarium water near the water inlet or in a high circulation area to ensure good distribution

- Once opened, the product should be stored in a refrigerator and used within 3 months (see best before date on base of bottle)

- Please ensure bottle top is cleaned & closed tightly after every use and bottle is stored upright

Marine
Centre™

LIQUID

gamma NutraSpray

All of our foods can be further enhanced by utilising the **Gamma NutraSpray range**

With the three products available, you can use the appropriate one required - to boost vitality or colour or just to help encourage your fish to feed

Gamma NutraSprays can be sprayed on any dry or frozen food.

If using with frozen food just defrost the food, strain off water, spray, mix and feed

Gamma NutraSpray Vitality Boost 50ml

(code 8380)

- Advanced feed-enhancing spray formulated specifically with natural vitality boosters including probiotics, garlic, aloe vera and omega 3
- Spray on any frozen or dry aquarium food for up to 6 weeks when feeding new or stressed fish or inverts to naturally maintain health and condition
- Use with Gamma NutraShots, NutraPellets, Gamma Frozen and Dry

Ingredients: Water, spirulina, aquatic appropriate yeasts, nutritional protein-based probiotics, garlic, aloe vera, salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Gamma NutraSpray Colour Boost 50ml

(code 8381)

- Advanced feed-enhancing spray with specially formulated, natural colour boosters
- Spray on any frozen or dry aquarium food when feeding fish, corals and inverts to help maintain and boost their vibrant colours
- Use with Gamma NutraShots, NutraPellets, Gamma Frozen and Dry

Ingredients: Water, spirulina, root vegetable extracts, salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Gamma NutraSpray Feeding Boost 50ml

(code 8382)

- Advanced feed-enhancing spray formulated specifically with natural feed stimulants including garlic and blended amino acids
- Spray on any frozen or dry aquarium food to enhance the nutritional profile and encourage feeding in all fish, corals and inverts
- Use with Gamma NutraShots, NutraPellets, Gamma Frozen and Dry

Ingredients: Water, spirulina, aquatic appropriate yeasts, garlic, salt, crustacean derivatives, EU permitted antioxidants and stabilisers

Feeding Accessories

A range of items to help make the feeding experience easier and cleaner!

Feeding/measuring bottles

gamma dry seaweed

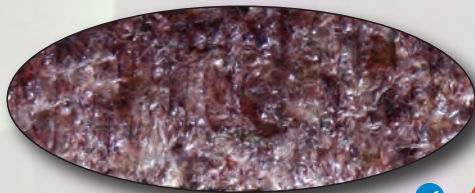

DRY

Gamma Dry Enriched Natural Seaweed - RED

Available in 12g (code 8318) and 150g packs (code 8320)

Enriched with garlic and omega 3 to naturally maintain health and vitality

Ingredients: Porphyra sp.

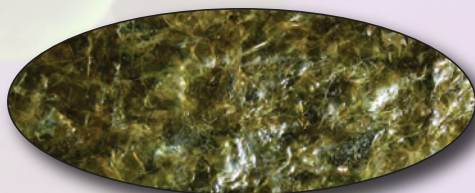

Gamma Dry Enriched Natural Seaweed - GREEN

Available in 12g (code 8317) and 150g packs (code 8319)

Enriched with spirulina and omega 3 to naturally maintain colour and vitality

Ingredients: Porphyra sp.

- The classic food for grazing fish such as Tangs
- Feed daily as part of a balanced diet and as a supplement to other food sources such as Gamma Frozen Foods
- Seaweed strips may be fed dry or pre-soaked in aquarium water or for further enrichment pre-soaked in liquid feed supplements such as Gamma NutraPlus
- Suitable for all saltwater damsels, clownfish, angels, tangs and wrasses and also freshwater algae eaters, African cichlids, silver dollars and sharks

Gamma Dry Seaweed Clip

(code 8321)

An easy way to dispense and secure seaweed in the tank - allows to you get a close up view of your fish grazing!

- Always monitor the feeding behaviour of your animals
- We recommend feeding as frequently as possible. Feeding small amounts, several times a day is best, using a variety of species-appropriate feeds
- Do not overfeed and always remove any uneaten foods from the aquarium once feeding time is over
- When using liquid coral foods, use species-appropriate feeds or a mix of LPS and SPS coral foods if you have a mixed reef
